It is a fact that the Israelites of Paris do not si-
generalized their emancipation by none of the
excesses of which the revolutionary period was so fe-
conde. If it is true that they could be seen everywhere
where they could proclaim their aspirations towards
freedom, we don't see them where these aspirations
took on a violent and disorderly character.

(2) Thus, as early as 1790, a Jew, Ravel de Ternay,
figures with honor in the Parisian National Guard
his own where he commands the 4th division for the quarter-
third of Saint-Jacques-l'Hôpital. In 1791, Ravel of
Tacin, a bourgeois living on Boulevard du Temple, is among
the 14 electors chosen by the "Temple section"
for the department of Paris; and Berthe the father,

In 1793, Calmer, 35 Mesley Street, was included in the "list of two hundred citizens chosen by the Attorney General, acting as trustee, in execution of the Law of September 29, 1791 on the Institution of Jurors. Pereyra, a merchant on Rue Saint-Denis, is an assessor of the justice of the peace in the Bon-Conseil section, and Jacob, lawyer, Grande-Rue du Faubourg-Saint-Denis fulfills the same function in the "section of the false northern town".

At the same time, the number of Jewish voters increases: Pierre Wolff, engraver, 39, rue Bourg-The Abbot represents the Friends of the Fatherland section; Philippe Simon the younger, a bourgeois, residing 243 Grande-Rue du Faubourg-Saint-Antoine, the Quinze-Vingts section; Jacob, lawyer, the northern section; Léon Fernandés, rue des Petites-Boucheries, and Moyse Sandoz, Saint-Abbey Germain, the Four Nations section; Jacob, watchmaker, the Beaurepaire section; and Jacques Bidermam, who continues to represent the section named in 1793 "of Molière and La Fontaine" is now one of the "144 citizens elected by the 48 sections to make up the General Council, the municipal body and office of the city of Paris".

Finally, in 1794, two Jews, Fray and Saum, are "Ordering and ordinary commissioners of the war"; another, Fribourg, is a lieutenant in the national gendarmerie, and Ravel, Blin and Heymen

– said the German – are increasing the number of those who, as assessors to justices of the peace, administered justice in different sections of Paris. At the same time, Jacob, 160 rue Avoye,

fulfills the duties of police commissioner of the Réunion section, and Foy is attached as bailiff at the justice of the peace court of the Mail section.

The Jews therefore occupied the following areas during those years: terrible, an important rank in the militia, in municipal bodies, in peace assemblies; But not a single one, not one. Not one was among the members neither of the General Security Committee, nor of the Revolutionary tribunal.

They accepted the consequences of the regime which had just "broken their chains", but "their arms did not serve to commit any crime, their foreheads were not stained with any spot (1) ». It is hardly necessary to mention this fact that, on the 21st of Brumaire year II, when the revolutionaries entered took it upon themselves to plunder the temples, the Jews of the rue des Boucheries offered the remains of their at the Convention, dominated by the Montagnards, saying: "The Israelite people have always He knew his happiness through very wise laws. from the top of the Mountain (2)".

But what is such a minor incident? what was the bearing capacity in light of the excesses of the time? Perhaps even the Jews of this expensive neighborhood – Charent-le-Pont, by a play on words, a détournement a danger with which they were threatened; for the Israelites – the Parisian elite, no more than their fellow citizens, were spared during this period. The Empire.— Napoleon I's feelings toward the Jews.— Their professions at the beginning of the century. — The General Assembly The assembly of Jewish deputies and the Great Sanhedrin. — The decree of March 47, 1808: outlawed. — Letter from Mr. Crétet, Minister of the Interior, to the Emperor; note from the Archchancellor—to link; letter from the Prefect of Police: triple tribute to the good Conduct and Morality of the Jews. — Organization of the Synagogues consistorial gogues.

No changes were made to their condition until the accession of Napoleon I. Gathered in In small communities, they continued to celebrate their cult, the poor class still little mixed with the general population, retained by a remainder of fearful, but all respectful of the laws of the State and reconciling the duties of their religion with their duties of citizens.

However, the prejudices they had so much suffered remained tenacious. In Paris, they continued—harmed them to "collectively overwhelm them with humiliation—tions" and to consider them "not as holding < to a distinct religion, but as forming "A foreign people in the State (1)." In Alsace above all, a great ferment reigned against them.

(1) Some observations concerning Jews in general and particularly the heart of Alsace. Paris, 1806. — Observations on an article by Mr. de Bonuld on the Jews, published in the *Mercure* of France on February 8, 1806, by J. Rodrigues fils. Also consulted by Napoleon, he estimated—on the contrary, that "specific laws for the Jews could only be dangerous(2) », because they were bound to confirm "pre-conventions" that it was useful to destroy. He pushed even the political sense to the point of proposing to erase in all legislative, administrative and judicial the designation of "Jew" which rat-attached to "a host of unfortunate prejudices" reuses" and to replace it with "Hebrew" or any other that would merely recall the worship professed.

These wise words of advice were not heeded. When, following the decree of May 30, 1806, Napoleon—Leon decided to convene a "general synagogue"

of the Jews," he did so in a spirit that was to them completely hostile, and in disgraceful terms of this major political event.

His correspondence (1) and his speeches to the Council State (2) testify to the "strong reservations" that he had against them. According to him, the Jews were not that < a nation within a nation (3) », and, making al-illusion to the complaints he had received about their account, he said that they had "replaced the feudal-'city (4)' and that it was 'too humiliating for the na-French tion of finding itself at the mercy of the nation the vilest (5)". This handful of ardent individuals at work, radiating the joy of living in the homeland they had long ago adopted and for which they had shed their blood, was, in his eyes, by turns "a population

within the brotherhoods, morals were regular, sheltered from reproaches, but religious fervor, that mixture Jews with other citizens had not yet begun, needed to be directed, and the costumes, still bearing the marks of a backward spirit, needed to be set right. The Rabbis even, to whom the Organic Regulation of 1806 had, among other duties, entrusted the mission "of to remind everyone in all circumstances of obedience to laws", they struggled to comply with the discipline required.

The Consistory, which had been charged "with ensuring so that the Rabbis cannot give either in public, or in particular, no instruction or explanation of Joy that does not conform to Assembly responses converted into decisions doctrinal reforms by the Great Sanhedrin," the reprimands ordered severely and deemed it necessary to do strictly observe the 1808 regulations. It was with this firmness that he proceeded with regard to temple trustees. The 1805 regulations, which made it his duty "to maintain order" "within the Synagogues," gave him a

It was not out of ingratitude that the Consistory acted in this way. The Israelites of Paris had, like their coreligionists in France, a profound sympathy for the reign of Louis Philippe who had been truly paternal towards them and liberal. "There is recognition in their devotion," Crémieux had once said in one of his speeches to the king (1); and these words were the true expression of Jewish feelings for this government which had neglected nothing to ensure equality, in accordance with the Charter of all French citizens before the law. The abolition of The oath More Judaico was one of the greatest benefits, one of the most meritorious acts of this reign.

We know the profound humiliation that they felt the Jews being forced to lend money before the tribunals an oath that kept them out of civilization. As early as 1816, the Chief Rabbis of

The Central Consistory had published a "declaration-dogmatic tion" attesting that the judicial oath—a loan from an Israelite, in some cases and in any place whatsoever, by pronouncing these paroles: "I swear" was for him a religious act having all the force and rigor of the oath, which forced him to tell the truth, without any other intervention, no other formalities, nor ceremony whatever was necessary. Despite the adherence full and complete endorsement of the Chief Rabbis of Paris, Metz, Nancy, Strasbourg, Bordeaux, Marseille;

As soon as it had been recognized as indispensable to rebuild the temple on Notre-Dame-de- rue Nazareth, the Consistory had taken care of finding the necessary resources. We had transferred the religious service in a rented space on Mont- Street Morency, No. 20, but the cramped space demanded that this provisional state cease as soon as possible possible.

To successfully complete its projects, the Consis the mayor wanted to transfer ownership of the building to the City provided that she took charge of the reconstruction. This solution, he said, had | “immense advance- the "tag" to bring the Israelites of Paris back in in the "common law" system. To calm the suspicions- tics and apprehensions of a part of the Jewish population, he had consulted the Great Rah- – bins on this subject, and it was only after having "received From them, the formal declaration that no scruples religious leader did not oppose this transfer” that he had adopted the idea. But the Community, which

had acquired this property "at the price of great sacrifices” resolved, once again, to resist

to the City's requirements, and to oppose the ban-

The merger project was seriously challenged. the study. The Consistory consulted the Rabbis of Marseille, Bordeaux and Saint-Esprit on the means the most effective way to achieve the establishment of a common rite. A commission (1) was appointed which, in a short time, filed the most favorable, and declared that this would "ensure the "fusion" than to build, on one of the points where The Jewish population was doing well, a very large temple where worship would be celebrated according to the practices mixed agreements adopted by the commission.

While the Consistory was sincerely searching—the means to achieve this goal, the administration tion was installing its Synagogue at 23 rue Lamartine, in rented premises. 3. The gabbaim and the five prud'hommes may give permission to pray during the days of Rosh Hashanah (Rosh-Hashanah on Yom Kippur) and the other days of the year: they will also be able to defend themselves against it, and prevent man which will cause disputes or quarrels in the Synagogue, or will commit blasphemy and frivolity; and they may strike such men could be fined up to three pounds, thus that those who insult the Gabbaim in the Synagogue in the performance of their duties.

4. The first two years, that is to say from Rosch-Hashanah 5665 (1804) to Rosh-Hashanah 5667 (1806), the Gabbaim will not be able to give a denarius to a poor person or foreigner or sick person, whoever they may be, from the Synagogue, if not on the advice of the majority of the Hebra. And Starting in 5667, measures will be taken regarding this matter.

5. The person who, called gabbai, refuses to accept performing these functions will be punishable by a fine of six pounds; If she is nominated twice in a row, she will be able to refuse. the second time without a fine.

9. The price of the aliot (mishvot for reading the Sefer) and other mitzvot of the week are paid for immediately after the reading of the Law and will be in the Synagogue's offering box; that of the aliot and miçvot of Saturdays and holidays will be received month by month.

10. Every Saturday and party pays two cents for the Synagogue.

11. Anyone who has an official religious holiday, such as circumcision, union (for circumcision?) or unterführer (which accompanies the tiancé), pays twelve sous for the Synagogue.

42. A fiancé who wants to have a legal olia for the Saturday before or after his wedding, will have this right by paying three pounds to the Synagogue and three pounds to hazzan el trente sous au samass. If this fiancé has not (rented) of space at the Synagogue, the Gabbaim with five members will grant him the above rights at the price of a tax which they will fix.

43. Any member of the Synagogue who makes a contract a wedding gift for his son, or his daughter, or for himself, will be obliged to have it written by the cantor of the Synagogue the documents from the first contract, or at least one of them if His future ally brings another writer to his side. Price: thirty under for each piece, and for the samass as a witness.

contain more than one hundred and fifty files relating to the Jews of Paris during the eighteenth century⁽¹⁾. These are the files that we analyzed and grouped together to establish the situation of the Jews in Paris that era. The files are not aimed, as one might say, at that time. The files are not aimed one might believe, offenses or crimes committed by the Jews; they relate to all the incidents of their existence in the capital. Barely tolerated in the city, they were indeed subject to surveillance spear from a police station, just like the foreigners; they reported directly to an inspector special, were placed under his immediate authority and owed him a detailed account of their minor acts. This is why a if a large number of files concerning them appear

Although in reality one cannot make history only with police documents, including the sincerity is suspect, whose conclusions to all the less are generally erroneous and biased, we could not disdain them when they embrace in the smallest details of the life and customs of a catechist a group of individuals placed entirely under the control of the police. "There is nothing small," said Michelet, "for who seeks and wants to understand.

Moreover, the number of Jews who are quite limited is were able to reside in Paris at that time without their names may have been mixed up in any way with inci-police teeth or mentioned in the states that were

drawn up regularly from 1755 to 1760 by one of the inspectors tasked with monitoring them. Does that mean Is that why they were all people without confessions? To be convinced of the contrary, one need only browse our sketch of the Jews of Paris under Louis XV (1), where we gave an overview of the Jews grouped in the city at that time. Names Those deemed irreproachable include: these are, among others, those of Solomon Benjamin, placed by the Farmers General-raux at the head of the Tobacco Factory; of Israel Bernard de Valbrègue, interpreter at the Library of the king; of Michel Goudchaux, general syndic of the Jews of Lorraine; of David Pereire and of Jacob-Rodrigues, his brother, the teacher of the Deaf-Mutes; by Moïse Blien, General Syndic of the Jews of Alsace, who distinguished himself through his generous philanthropy during the famines of 1744 and 1748 (2).

Certainly, other important Jews lived there.

But these Jews were placed in a situation almost privileged and, except for Bernard de Valatrègue, Jacob Péreire and Moïse Blien, whose relations with their "Synagogues" were constant, those that we just quoted did not actively mingle to the lives of Jews at that time.

It is this existence that we have sought to fix here.

CHAPTER ONE

Regulations and Ordinances Against the Jews.

POLICE GENEHAUX LIEUTENANTS

The Jews of Metz were among the first to frequent Paris. No doubt strengthened by the privileges afforded by letters-very old patents had been granted to them in the Metz region, also eager to leave the district too narrow, which was specifically assigned to them, and they were only supposed to reside in limited numbers, they believed to be able to establish their settlement in the unhindered capital. During the first few years, it is true, they were not subjected to any harassment. Assimilated for the surveillance of foreign residents, they lived under the moral guidance of three or four of them that were commonly referred to as name of "principal leaders of the Synagogue of Metz.

But, in 1719, the police became concerned about the arrival of some Jews who, taking advantage of the facilities left to their already established coreligionists had not believed

Two exempts were therefore tasked with ensuring that those who had neglected to regularize their situation and, to suppress their aspirations for "independence", the they put at Fort 'Evêque from where the "delinquents" only came out to be re' resuscitated in their country of origin.

This partial measure was soon deemed insufficient. Mr. Teschereau de Baudry, less easy than Mr. de

Mr. de Baudry, no doubt moved by so many irregularities-rites, made the Regent keep a note which was the point it is abandoning a whole series of measures against the

uifs.

It was a "Project to leave no Jew in
"Paris without a passport."

It stated that it had "always been customary to no one in this capital should suffer from it without express and specific permissions," that the lieutenant general of Police of Paris, who was targeting their passports or permits, were found by this means

within reach to monitor their conduct, and that "when they they dared to abuse the tolerance that was shown towards them to suffer in Paris, they were expelled on the spot, or "Imprison them for disobedience."

Teschereau de Baudry, recalling that in the month of The previous January, the Regent had decided to "hunt down" The suspected Jews of Paris, from some Synagogue that they can be," he asked to "restore this "old rule" and to imprison those who would contravene. The Regent approved this project on May 6, 1721. We will soon see what there was to These accusations are true.

The magistrate, thus armed, should have easily because of the few Jews who would not decide to regularize their situation or would persist in to return to Paris despite the rigorous defense they It was done.

However, a year later, a second report was addressed to the Regent. What new facts could have emerged? To provoke him? The Lieutenant General of Police had passed from the hands of Mr. de Baudry into those by Mr. de Voyer de Paulmy, Count of Argenson. His Had distrust towards Jews been awakened? by police officers, whose malicious actions was already being strongly felt?

We can believe it. It's certainly based on the report. from one of his agents whom the new magistrate app- was trying to obtain, on June 22, 1722, the maintenance of the interre- general of previous decisions.

The matter that may have motivated her was related to a Alsatian Jew, Weil (Joannes), who provided food to some Jews and for this reason had attracted the police rigor. Here are the terms in which the Inspector- The speaker was saying:

"as he would deem appropriate."

Mr. d'Argenson soon left the Provostship for the
Ministry of War; he was replaced there by Mr. Ravot
d'Ombreval, under whose magistracy the Jews of
Paris had some respite. This one, so as not to
to become entangled with the Jews and their requests for residency

gave way to Mr. Hérault who took office on
April 28, 1725 and remained there for fourteen years.

With him, the procedure against the Jews took on a whole new dimension.
following a more aggressive, more rigorous form. From
In the first months of his presidency, he complained about

How, in the absence of Could this clause "ensure their conduct"? Or we know, however, that "the people of this religion" are "very suspicious" and that "the bad guys" are there "in large numbers." Isn't that why "the in-public interest "committed at all times to insinuate this clause in all Jes passevorts that have been granted to the Jews? Moreover, it was the only way to be right about those who do "bad ma-" "Neeuvres." The minister, bowing to reason d'Elat replied: "Mr. de Breteuil will put the clause there customary. This December 24, 1725.

Mr. Hérault was not satisfied with this postscript resigned. He, too, wanted to obtain from the first Minister the authorization to imprison, to hunt, to to punish the Jews as he saw fit; indeed, he obtained this. Mr. de Marville, who complained about it, therefore asked
in 1742 that they returned "to what had previously been practiced"

imagined that Mr. de Breteuil's reply had
misled, and it was decided, as far as the Jews were concerned,
to "put things back on the old footing".

However rigorous they may have been, the
lieutenant-generals of police had no guards or-
forget that, according to the will of the people, their magistracy was not
not made up only of severity, but also of paternal-
kindness. The bourgeoisie especially had faith
in their power, in their reputation for integrity and.
of wisdom, and she resorted without hesitation to their
authority for the honor and good of the home, each
whenever necessary.

The magistrate lent a sympathetic ear to
complaints, to the confidences shared with him; ii

Mr. Berryer was one of those who showed them the
more rigor.

he had called a Mr. Legrand to the position of Inspector-

"Figures," said Legrand. "That's good," replied Mr. Berryer.
"If they are not in compliance by January 1st, arrest them."

The police's bad mood was understandable.
That was the time when two Jews, whom we already know,
told the story (1), Jacob Bacharach and Assure Mayer,
play the most outrageous tricks on him, put on
feet, exempts, commissioners, magistrates,
ministers, and provoke conflicts between them
an incredible number of letters, notes and reports

anxieties, hopes, by which these two
Jews took turns passing them from 1745 to 1759.

These mad dashes for the Jew were not without

The lieutenant general therefore requested that he be put

to arrest them "under the general order." It was a
ingenious formula, effortlessly agreed upon, and which dis-
thought of motivating the imprisonments that one does not
could explain precisely. "By virtue of

Mr. de Puyseulx, then Minister of Foreign Affairs one day, managers had to call Mr. Berryer back to more than justice and moderation.

Among the victims of this strict order was In 1749, a Jew from Saarlouis, Elie Worms, who came to Paris to request payment for various supplies the acts he had committed against the king's troops during the campaigns of 1742 and 1743. Another one, named. Joseph Plocque had also made supplies to the army and was in Paris "to reckon with entrepreneurs." It appears, a report said, that he enjoys a good reputation. Despite this, and despite the proofs of zeal and loyalty they had given born, both had been arrested under the the general order and thrown into the Grand-Châtelet on January 21st vier 1749.

THE JEWS OF PARIS IN THE 18TH CENTURY 45

Once free, they wrote to M. de Puyseulx and requested permission to stay in Paris for a few months. The minister sent the memoranda back to Mr. Berryer saying to him, "I will not deliver them from it without I would have liked to know beforehand if they would abuse it, and I don't Then, to be better informed, I should contact only... I know that the stay of people from that nation often leads to many abuses, but also there would be— There is no hardness in refusing this grace to those who are interested in supplies for our armies and whose presence is necessary in Paris to do "Settling their accounts or monitoring their affairs?"

The magistrate had to defend himself against this just reproche; but at the same time he didn't want to abandon anything to give up one's rights. he presented his observations to the lieutenant of police and Jes followed up with a series of decisions intended to "maintain" the Jewish people "in order" and the police."

In support of these "observations," Dumont provides several states to the lieutenant general. Already Legrand had communicated, every month, the status of the Jews to Paris; but, except for a list of about ten names, dated April 25, 1749, its records are not included in the Bastille Archives (1). Dumont, for his part, had there was some reason to put his services to use. He was past master in the art of grouping observations that he might have to do with the Jews. He made them states which, by their clarity of assessment, by their concise vigor, were bound to strike sharply

the magistrate's mind. These states were consecrated to the Jews who were in Paris without a passport and which he considered "totally useless in this city." The Bastille Archives have told us about it. Four of them have been preserved. They are dated November 2, 1752. and February 15, October 12 and December 31, 1753.

Dumont died soon. He disappeared at the moment where, as a natural reaction, the police stations, No doubt weary of this merciless war, he relaxed were responsible for their severity towards the Jews. We know Dumont already lamented this weakness; Buhot, who succeeded him in 1754 complained about it even more, as a man saddened to see the prestige of the police so significantly diminished.

He knew the situation of the Jews in Paris, their position and their conduite. For nearly five years, from 1755 to 1759,

Every six months, he drew up a report of those who were in the city. These lists... they are activating their homes, their countries of origin, the reasons that brought them to Paris, the delays in their stay, and observations on their conduct: all This is done with meticulous care, a real concern for the regularity and punctuality (1).

Buhot appears to us, in fact, more as a bureaucrat so deeply aware of his duties that he is like an ardent policeman. He grieves over the "abuses" of which the Jews are guilty in his eyes; but he does not place any anger, and he only notices them to seek a remedy.

On some occasions, he was quite harsh—those who did not submit to the rule, He did it without anger or hatred. Sometimes However, impatience overcame him; the Portuguese Jews

– the little masters, among others – Jo put on the teeth; the German Jews give him a lot of to do; some go, come, leave the city, without to give notice, remain without permission in Paris for a long time—even after they "declared" their departure; Others are retreating to the village of Chaillot to avoid to register, and from Chaillot descend daily in Paris "to sell and buy "Various goods." All these "Hebrews," as Buhot calls them – and he finds the expression so happy that he never tires of repeating it – all These "Hebrews" are suspects, swindlers, ambulance drivers, junk dealers, or swindlers, and there is no that time, if we want to get the better of the "people of this nation," to put an end to their "independence" "Highly reprehensible." Buhot did his best; but this zeal His excessive behavior sometimes led to unpleasant adventures for him.

In 1765, the lord of Heusse des Cotes, seigneur of Meizieu, near Grenoble, filed a complaint with the lieutenant General of Police against Saul Vidal. This nobleman, seeking to get rid of a Go- tapestry Helins, who "represented Abraham and several others" patriarchs," he proposed it to Vidal. The latter made it mar-purchased for 1800 to 2000 pounds, or "twelve pieces" of the finest Damask from India to make love- "blemens." But the deadline set for payment was expired and Des Cotes didn't hear anything about his die: biteur.

The police inspector gave chase. Saul was taking refuge in the Temple, where Buhot sought to "reach" him, but without success. Vidal, equipped with a safe-conduct, was safe from his pursuit.

This Vidal was no ordinary man. With an elegant air-gantes, very well regarded among the lords and particular-lirudely spoke the House of Clermont, he was very pro-managed by the offices of the Duke of La Vrillière. However, his safety was soon compromised. On
the intervention of the Lieutenant General of Police, Mr. de
Choiseul had given the order to execute the letter of

Temple.

The Temple, as we know, was a place of asylum where the
debtors withdrew to escape the rigor-

At Fort-l'Evêque and at Châtelet – where one mounts less rigorous treatment towards prisoners – the Jews were no less pious in their zeal.

Someone, like Jacob Worms, asks that he be return "the books, the tablets of Moses, and others things that were taken away from him concerning the exercise of his religion"; for "he has all the more interest in to turn to God, whom he needs most. in the captivity to which he is reduced." Another, like Mayer of Vienna asks for his prayer books, so that in his "disaster" he would not be deprived of "to fulfill the duties of his religion"; and he begs that he be allowed to receive from his colleagues "of bread and meat to celebrate Easter."

The Jews did even more. When they had the means, they asked to keep with them Jewish servants, both "for the preparation of the victuailles" than "because of the legal ceremonies" to the- which religion obliged them to. It was conceded to them. usually, but it also happened that their request was rejected.

This is what happened in 172% to Samuel Levi, a Jew of Metz, although he had been detained for many months at Fort-l'Evêque, sick and without help. He had two servants to attend to his outside affairs and a cook to prepare his "food", which does not could "be accommodated only by" those of his nation, his Jewish law forbidding him as a crime to to eat with any other hand, to even use another- kitchen utensils other than those used for his nation." One day, his people were forbidden access to the prison.

Samuel appealed this decision to the lieutenant Police chief. How can I make myself "To cook on Fridays and Saturdays?" he exclaimed. He. Your Grace knows that it is not permitted to us "Not to touch fire or light." He therefore asked...

that he be granted the same pardon as others and that he left his two servants free to serve him. He didn't get it. A Mr. Millain then intervened with Mr. Ravot d'Ombreval, and "in his consideration" it was agreed to that Samuel should keep his Christian servant. But This was an exception, a true exception, because "We have not suffered until now that the Jews have Christian servants, in fear that they would not make them change their religion!" Thus this the prohibition, pronounced by the Councils, was still observed in the 17th century: the Christian who served a Jew risked severe punishment if he could to claim the authorization of the clergy.

Following an anonymous tip, the police arrested, in 1726, the woman named Marie Béquiat, of Bour-Belain, known as Manon. She was accused of "having been in habits with Samuel Lévy, a Jewish man, his master," and of having had two children by him. She was taken to the

It obtained, as had been agreed, < the delivery of several thousand shares for liquidation certificates,” which were distributed due and negotiated on the spot a few days before it was released to the public.

The association thus became the absolute master of the square.

The Paris market was in turmoil; the merchants were... they made their way; the royal effects were discredited; the stocks suffered a considerable decline; and the The confusion was such that people even believed–so much money was rare – "that it was the King who made it sell his own so he could pay for the next dividend "deude." The police's attention was soon drawn to awakening. Jealous people took it upon themselves to instruct him. Plu–gentlemen "merchants" had had dealings with Madame de Rohan "such a treaty" which had not been implemented, and, furious to see such an opportunity slip through their fingers, filed a complaint, revealing the financial conspiracy in in which the Princess had dipped her hands.

The police conducted a swift investigation, and, all at once The net stopped all the members of the association. This was done so quickly that Samuel Levi, protestant–so vehemently opposed to his imprisonment, he exclaimed: "They are arresting me–rested without me knowing why and the funds of a The people from the first group are all jumbled together in An office, without being counted. At that point, she had already received 70,000, and the definitive guarantee of services rendered was between his hands.

The Company did not have time to realize the benefits the results she hoped for. The general deliverance of letters had indeed not been long in following the delivery made for the benefit of the association, and had not left him that the timeframe was too short to benefit from it. Furthermore the public offering having "equaled the share price" "with that of the liquidation," the bankers, deceived in their forecasts, they lost "considerably". In a way, the report addressed to the minister stated, < that he There seems to be more professional jealousy in all of this "A matter that has been accomplished."

Nevertheless, the scandal soon erupted, public-ment. All the prisoners were successively interrogés by the Count d'Argenson who, in his capacity as the lieutenant general of police, had insisted on asking them questions to operate himself. There was no doubt about it. Two formal treaties had been concluded with the princess de Rohan, one through Letourneur, her attorney, the Marquise de Lunaty, with La Pommeraye and de Corcelle; the other with La Dagrée de Farcy, who had associated "the two Jews" with it. The police report was very explicit: "The purpose of these treaties, it was said, were that Mme de Rohan would do to issue eight thousand new shares, before he no other appeared in public, whereupon She would be paid 150,000 pounds, of which she has already received 70,000, and for the remaining 80,000 he was given a bearer note for this sum payable in the month of June." The interrogations were no less clear.

THE PROFESSIONS OF JEWS

If the Jews took such an active part, sometimes
predominant, to these traffickings, it is – we must not
to tire of repeating it – that every regulated industry
their ties were forbidden to them and they were inevitably
forced into the vilest tasks. One said of them

hatreds, disappointments, and angers of all. It was the bankruptcy.

Such was the fate of many Jewish bankers in the 16th century. But then bankruptcy did not carry off with her the ignominy that is attached to it nowadays. Infidelity in commerce was almost natural there. Bankruptcies multiplied; debts increased; they felt no shame, and the creditors showed as much indulgence as promptness to stifle these kinds of thefts (1).

It is generally believed, however, that the Jews were not always treated with such kindness. We were all the less lenient towards them as, yielding to a crude prejudice whose reality had never been fully proven, they were always assumed to have a certain strength. Once captured and detained, they were prosecuted with rigor from which the best results were expected, but which ultimately turned to the detriment of their persecutors. authors; for by depriving the Jews of their freedom, they It is almost impossible to find a way to link up.

We did an exact account of the value of these effels, and so much in hillets that in reconnaissance, some were found for 1,247,333 pounds. The liabilities amounted to only 931,808 books.

Lévy was therefore right to say that there was "in The sealed box had effects far more than sufficient—"sants to pay everyone," not to mention that several, among those who distinguished themselves by their hostility, were "on pledge". His debts are mounting. with over 1,200,000 pounds, his recommendations to 90,000: "That would be," he said, "abandoning what little there is left of although I have hope of ever recovering."

All these arguments struck the lieutenant general-police officer who eventually became astonished by the obstinacy with which Chamblin and Taxis refused to enter in arrangements with Samuel Lévy. Mr. de Villebon, steward of Marshal de Médaris, in charge of verifying Lévy's memoirs, he had found them "quite true-similar," and had stated that, among "those who claim creditors", several "were his debtors "authorities of considerable sums." On the advice Mr. de Villebon, the magistrate summoned to the Hôtel de la Provostship of Taxis, Gras, Mestrezat, Parat de Vareille, Saint-Priest, Ageron, Legrand, Chamblin "and Com-company," and confronted them with Samuel. This misfortune-reux, despite the unjust prosecutions he was subjected to the object, despite the raaladie that its internment had caused, despite the miseries that Langlade he was subjected to in prison, did not receive any punishment to prove, through figures, accounts and calculations, that its requests were "based on titles" and "its re-faithful answers." Nothing prevented us from He did him justice.

It was only in February 1726 that it was handed over free. He had spent fifteen months in prison for a bankruptcy of which he was accused, which he did not have done and that, by its very clear situation, it was not not at all tempted to do so. Strange thing! if he was broadened, it is not that we have consented to recognize his innocence, it was simply "false by "His creditors for having provided food." This was not one of the least curious details of customs at that time that the obligation where one

was, by recommending a prisoner for debt, to provide for its upkeep through a fixed subsidy. From that the creditors declared themselves unable to continue, the prisoner was released if he was not detained for other reasons.

Samuel Lévy benefited from the weariness, which was intentional. perhaps, from his creditors, while in a In a similar financial situation, any other non-Jew would have emerged victorious from these trials. But, As we have said, the Jews remained the victims of age-old prejudices; whatever the bad faith They were unquestionably criticized by their opponents. of dishonesty and, in the prejudiced mind of the police or people, suspicion being equivalent to certainty, they were immediately treated as criminals.

It was especially when they were engaged in business of money that the Jews had to suffer from this suspicion. The protests were numerous, inevitable—tables in this type of business that no law regulated it, and as soon as one of them rose up, people shouted to the betrayal of the Jew and his nation. Despite all these tribulations, he did not fail of Jews in Paris, during the 18th century, who made "The paper trade and banking." Do we have It goes without saying that this was the only one to which the nation Jewish, as a whole, could be the least illegal—How to indulge? Besides Samuel Lévy, there were important bankers. Almost all of them were from Metz. We have already mentioned Mayer Lyon Schuabe, Salomon

Lévy, Jacob Worms. Isaac Spire was accused in 1716, with a Geneva banker, "for having wanted to do to send abroad one hundred and forty thousand gold louis "old species." Their innocence was recognized, the

The falsity of the news was demonstrated, and they were released after spending ten days in the Bastille. Olry Alcan was a regular on the street in 1749 Quincampoix. Much later, Jacob Goldschmidt, of Nancy, Jacob Lévy of Bischeim, and Moyse Isaac Spir Lévy, from Metz, all three very honorably known, had their bank houses on Beaumont and Saint-Julien des Ménétriers street, in the center even their fellow believers. Nathan of Morhange, Having matured, he established himself on rue de l'Echelle in 1755. Finally Samuel Peixotto, a Jew from the Orléans region, to whom in 1771 "the the government entrusted the general supply of

"Monetary of France" came to remain at that time in Paris.

But there weren't only oven entrepreneurs military supplies, traffickers and bankers among the Jews in Paris. Many contributed to raise the level of negotiation by making the comtrade in silk and drapery. The Jews portugais particularly excelled there. It was against around 1767, the trade guilds arose – they saw so violently in trying to stop them in this road that they accused them of invading.

There were also jewelers who enjoyed a certain degree of... of a good reputation. Mayer, from Vienna, was the jeweler Marie Leczinska's designated companion, and accompanied her in his travels. Jacob Baccarat was, in 1745, a supplier sister of the dauphine; David Oulif had Gans this comtrade in close relations with the Court; Moses Polack Cahen and Jonas Lévy, from Amsterdam, were in Paris in 1745 "to sell diamonds,

pearls and all kinds of gemstones of different colors"; and, in 1734, Tapin announced that David Revel, Judas Revel, Elie de Saint-Paul, Lange Sazias and Josué Naquet, all five from Avignon, came to settle blir "to trade in diamonds, pearls and of silver stripes."

In truth, this kind of case could count still among those to whom the Jews devoted themselves more specifically. But one could see, to the bold ideas that were awakening in their minds, that secondhand shops and thrift stores should no longer to remain for a long time the special object of their trade.

Already in the first half of the 17th century, there
There are, admittedly rare, those who seek to break the en-

Some give free rein to their imagination.

A Portuguese Jew, named Buzaglio, who had been exiled, he returned to France in 1747 with an invention. tion of which he was the author "to make cannonballs which "They were supposed to set fire to the enemy ships." He was returned to Paris on the orders of the Prince of Conti, and It was the Duke of Penthièvre who had introduced him to minister.

No less important in its own way was the idea of Salomon Blien, from Metz, who had designed the double project for a low-cost bank and a lottery in life annuities—thus anticipating by almost a century institutions of this kind, such as the abundance of money and the dissemination of financial knowledge were later to become so common.

There were some who, thanks to a truly commendable in the deplorable conditions in which they find themselves were, managed to carve out a place for themselves among the in-

the king.

There were many examples of this kind. They were particularly significant when it came to-knows of Jews whose conduct was the harshest classified by the police.

According to Buhot, Cerf Philippe de Manheim, a secondhand dealer who "swindled several merchants" both in Paris and in the provinces." He has no papers, we I am putting the Bishop at Fort. The magistrate releases Cerf, not because his innocence was recognized, but because "he seemed quite punished and he promised to to get into compliance.

Similar, even more laudatory certificates, were delivered to David Oulif, Lyon Gloga, Moysen Polack Cahen; to Joseph Elias, of Hamburg, and Raphaël Jonas, from Casal, who treated them as true. two crooks had been put, one in Bicêtre, and the other in Fort l'Evêque. They praised their words in such expressive terms their honor, their probity, their good faith, their integrity, that they had to be set free.

Buhot himself could not, in various circumstances tances, relaxing to testify to the honesty of some Jews. He did it in 1769 for Jacob Simon, the engraver, to whom a forger had given to engrave, without him nothing but a seal bearing the arms of Mr. de Trudaine. [They had themselves "published at the sound of the cash register"] at every crossroads, they declared and specified the place of their dwelling, so that whoever might have to complaining about them could lead them to come and find them, and if necessary even to have them arrested.

David Oulif, who in 1745 had been relegated to the Tapin's report called for the order to be revoked of exile, and recalled that before his departure from Paris he had been yelled at like that. He had acted the same way in passing through Châlons, through Toul and arriving in Metz: which, according to him, constituted "solid proof" of the "purity" of his conduct.

The causes are undoubtedly multiple, such as reports that Jews had with society.

The religious question played a certain role in this rapprochement of two castes so foreign to one another to the other. Thus, Ms. Lecour de Malon, in defending Astruc, so warmly defended, at the same time a religious work. This Jew, who was on the verge of conversion, had begun his instruction with Father of Berthonie; but this one, obliged to surrender in Spain, had placed his catechumen between the hands of this pious woman. Astruc -- she had she herself said -- it became for her a sacred "deposit" that she was jealous of handing over intact and pure to him who had entrusted it to him. Mrs. Ma-'s fanaticism long, made of extreme sensitivity and tender pity, was such that his heart, filled with a revealing refinement-tieux, surrounded Moses and his with the same caress Brother Solomon. This union was entirely fortuitous, and of these conflicts of interest, where they were often called upon to intervene _interposcer, one day a kind of conflict arose of influences between the Advocate General and the Prosecutor of King of the Admiralty. This is what provoked him.

THE JEWS OF PARIS IN THE 18TH CENTURY 111

Following a silver dispute that had raised between Salomon Astruc and Isaac Dalpuget, Buhot had been given a mandate to ensure this last and to take him to the Petit-Châtelet. This order had been obtained, in 17:5, on the recommendation of Mr. Poncet de la Grave.

But when it came time to put it into action, we found himself facing Mr. Joly de Fleury, who protected Jsaac Dalpuget. The police found themselves very She looked sheepish. PROSELYTISM AND RELIGIONAL AFFAIRS

This is an indisputable point of Jewish history. today, hatred against Jews, prejudice and the prejudices were solely the work of the Church. And then human pride is so great that everyone imagines themselves to be above weaknesses of others and presumes to conquer where his neighbor has succeeded combé. The Jews, therefore, did not allow themselves to be deluded. This is due to difficulties of this kind in their goal. so true that from 1718 to 1772 we count no less about forty, according to the Archives of the licutc-general finance, to whom "Dicu granted the grace of knowing Jesus Christ." But, being novices by circumstance, they knew him more or less intimately, and put in their relationship with Him a greater or less sincere.

12: THE JEWS OF PARIS IN THE 18TH CENTURY

What feeling did they each give in to? Everything depended on the timing and the cause. Such as, like Isaac Funsèche, from Bayonne. and Cavan Mus-Tapha, a Jew from Messina, became an admeliter at New converts, and instructing "in the truths of the Catholic religion," because they were "without mis-third party nor profession to provide for them"; such others, like Léon O!ry Spir Lévy and Cerf de Morhange, who "had several captains on the "body," they requested baptism to obtain "a "Leave," Ivic was a Jew who, having been unable to obtain the permission to remain in Paris, was baptized for to be able to do without this authorization. That was the point. another who, detained for lack of a passport, was released to be better able to make an abjuration; Finally, it was Messrs. d'Arniche and d'Albuche who, for having a safe-conduct, they argued that they were putting "to their advantage" their detention at the Temp'e "to educate themselves" truths of the Christian religion, for which they had been fond of each other for several years born." What nobler use could they make of their retirement?

These were some of the alleged reasons by the Jews to gain "the grace of devotion and the virtue of the sacraments.

They found, it is fair to say, such a warm welcome eager to serve the clergy, the priests were so undemanding in their choice of calechumenes,

It is quite clear that the Jews of this era have become a springboard for abjuration. When you ask men, the last of whom, the safest shelter against all persecution kind is the worship of ancestors, of sacrilege: to a another religion, the holy religion, the one in which they have put all their strength, all their confidence, we must expecting them to give in, by relinquishing their faith, rather to a necessity of the moment than to a con-

viciousness of their being. Who, in any case, could To be outraged by it?

The priests groaned at these deceitful conversions; they never tired of provoking them. Those who doubted Morhange's sincerity were the first to press him to submit sion to the Church. It was known that Salomon Lévy "had not He had no desire to become Catholic, but he had his views and his reasons for saying so"; Abbot Couette, His catechist, fuming and swearing, declared "that he should not would mix more Jews" and that "if he fell "Someone in his hands," well!... he talks about it- would be given to Mr. Langlade before beginning the instruction Mr. Le Py, director of the New Catholics, did not showed no less tenacity. "There is no more, "Thank God, there are no Jews among us," he said in 1728. And I hope it won't be long before he does. And he ` was nevertheless preparing for baptism, a few months after. a Jew named Birié, who, after a short time In a few days, he would travel to The Hague where he married a Jewish woman.

One might also doubt the sincerity of this wish. when we see that the Church went so far as to foot of the gallows, the pledge of his religious conquests, and provided they convert, to snatch from death the infat- two Jews, who made no fuss about accept this unexpected offer.

These catechumens, in fact, were not among those of which we had the right to be proud. Having reached this level of moral degradation, what did Moses matter to them or Jesus Christ? The Devil himself would have offered them the holy water font in which they would have dipped their fingers, without scruples. Their souls were open to all beliefs.

but above all to the one who promised them their lives saved and freedom.

126 THE JEWS OF PARIS IN THE 18TH CENTURY

Despite this, the Church, which realized that "Judaism, a male religion, primarily concerned with of man," granted him preeminence over the women, preferred to seek abjuration—The Jew's mission. His most serious efforts were directed on this side, as if man's adherence to the Catholicism was expected to double the price of victory. However, this should not be inferred that the Church aided the abjuration of Jewish women was known. The ease with which As we have seen, she welcomed the unreligious schemers. gion and without faith, proved that she cared greatly of the submission of Jewish women to the laws of Savior. The Institution of the Daughters of the New Catholicism Hadn't the Catholic Church been created solely for "These souls redeemed by the blood of Jesus Christ"?

It is nonetheless true that, according to the Archives of the Lieutenant General of Police, the Jewish woman features little in the record of pious conquests that did in Israel the Doctrine of Jesus.

Only two women are mentioned: in the long—a list of those who "tended their heads to "Waters of baptism." One of them, however, was not a source of pride for the one who had undertaken it.

"Manon, {° Louis Lévy. Jewish from Holland, had in 1734 "professed Catholicism" on the exhortations of the parish priest of St-Eustache, and "on the Chari- 5. AS Mgr the Duke of Orléans". We do not know if this long separation was not fatal to Angélique's tender aspirations or did not detach herself from the man she dreamed of marrying. The file is silent on the end of this sad novel; also silent on the cruel effect this event had on us had to produce on Ruben Schouabe. That's what made the Jews say that they were people without confession and without faith.

What more could they possibly be asking for? At that time They hardly think about broad and absolute freedom. They feel too despised, too humiliated, to conceive such a high hope. And even when the people, almost suddenly master of his destiny, will think to grant them the benefit of the freedom so gloriously con—who, several among them, will remain undecided, fearful hair, as if they considered themselves unworthy to see for themselves the radiant dawn of liberation rises, — of emancipation.

But they are allowed to live in complete safety. All their efforts tend towards this goal. "There is a middle ground between rob and murder people, and make them sit at his table. said Linguet in one of his outbursts of ambiguous liberalism A Protestant, a Turk, a Guèbre, a Jew, must live peacefully everywhere, so much that he remain peaceful there. clearly stating the accusations of which they were
the object or the bad actions attributed to them,
we had not mentioned at the same time the causes which
could, if not always justify them, at least
to explain and excuse them.

One of these causes cannot be disputed.

Jews lived in Germany, England, and Poland, under oppressive and shameful laws; in other countries, they were pressed against each other. 'Others, penned in, lacking air and light. They instinctively felt that our generous country of France, although placed under an arbitrary authority milking and despotic, was the only one or almost in which they could, without harming the State, benefiting it. On the contrary, to develop the genius of their "race". That is therefore towards this "restored peerage" that they were striving for the arms, and more particularly towards Paris where, badly-despite the shadow that had sometimes veiled his reputation of hospitality and liberalism, the Idea, Progress, the Tolerance shone with their brightest lights.

That, among the Jews welcomed into the capital, he some may have slipped in whose conduct and morality have The summers were dubious, no one would deny it. But if one think of the appalling moral decay of this

century, to the furious race of all towards wealth, to |

the indifference of the means employed to achieve it, to the destruction of all feelings of loyalty, of honor mother and family, one can ask why one would have demanded of the Jewish people certain things that one would not found nowhere.

Moreover, one might ask where the Jew would have drawn his inspiration. These notions about morality and honor? Was it in the Ghetto where we were locked up like refuse of humankind, where he was treated like an animal dangerous and malevolent, and where one does not know what there was something more painful, in his material life or of his moral state? CHAPTER I

JEWS AROUND THE WORLD AND PARTICULARLY IN BRITISH COUNTRIES AT THE BEGINNING OF THE 20TH CENTURY

Before studying more specifically how Jewish power is exercised in the Kingdom-United, it seems necessary for us to throw a overview of the different countries where this power slowly took root: and gradually developed over the two last few centuries.

There is hardly any country, in fact, where the Jew had not established its operation as soon as its keen instinct sensed something of ex-deplorable. That's how the good historian Cap-Figue shows us this (1) by engaging in the emb-worst Roman to all the little branches of the trade; taking over the tolls and all tax authorities' rights; selling filters, making

Religion, in fact, has never been an obstacle to the advancement of the Jew. There is nothing for him no difficulty, when he sees an advantage in it pressing, to make it cheap or rather a cheap, one might say, because he trades it willingly in exchange for another more advantageous one. The Catholic branches of Jewish families have therefore become quite numerous. But it is very rare for ethnic characters to which do not persist for very long after changing religion. All the more so do they maintain their integrity when The Israelite tradition ranges from Judaism to Protestantism. as has frequently happened in England – earth.

reproduced here. The propaganda made among the Jewish community is also very active and dates back a long time.

One of the most curious documents on this subject is a brochure printed in 1687. It contains two letters addressed by a merchant from London to a friend in Amsterdam. The first one recounts a heated controversy which allegedly took place at this merchant's establishment between the Father Saliam, a Jesuit, and Rabbi Jonathan: this completely refutes all the arguments of Catholic priest. In the other letter, we see the same rabbi launches into a conference combative with a certain Protestant named de Beza, who obtains advantages in his refutations. Jonathan expresses, in fact, his appreciation and gratitude for His new opponent, who "said a lot in a little words and completely removed the obstacles that he, Jonathan, had believed he could meet—to cross his path."

in Paris by "their roguery and their indoctrination" "Lite," according to police reports. They had already scoured the province: they had marked there—their passage was marked by "bankruptcies".

One of them in particular, Moïse Astruc, was noted as "noisy" and monitored for his "bad morals". He affected the allures of a fop and, despite the prohibitions of the police, stubbornly insisted on "wearing the sword and the neck-hunting blind." One day, on the Pont-Saint Michael, he was fighting with one of his Ravel's fellow believers, when the inspector of Police officer Buhot, having been warned, rushes to separate them. RER. Regardless of the high frequency of these conversions, they never reached that a tiny minority of the Jewish population.

12 JEWISH ENGLAND

The same is true today, that the resources of Protestant proselytism were multiplied, and that the fervor of propaganda is no less in Anglo-Saxon countries. There are at least a dozen re-companies known in England, dealing with the conversion of the Jewish version, the most important of which is the London Society for Promoting Christianity Among the Jews, who has an income of 40,000liv. sterl. and 154 agents. America has one a large number and Germany a few.

With all these resources, the mission-pairs specifically occupied with preaching the gospel Gile to the Israelites throughout the world are not In total, only 250. Reverend RW Harden estimates the number of conversions at around a thousand annuals, and Dr. Delitzsch does not believe that the proselytes made in Judaism by the Christian religion (we are not saying Catholic) may exceed 100,000; this figure is already respectable.

The most important country, due to the

come, in a kind of continuous exodus, these
thousands of Jews spreading across Europe

more expensive, without being able to withdraw from this compromising fraternity something other than a resurgence of unpopularity, if not outright hatred, for the Jewish name and the Israelite character. England, with its traditions of hospitality and its firmly established reputation of loyal land of asylum, is more than any other countries affected by this invasion of misery vicious and rapacious. It's barely possible the "Britishers" are beginning to sense the danger which threatens their country. As we will have more than once the opportunity to observe this at However, during this study, concern arose It is already being felt. Thus, in 1897, the Lord-Mayor of London, assisted by a large number of notable and wealthy citizens, organized in the Guildhall a meeting which voted an appeal to Tsar in order to soften certain laws to be enacted and enforced against his overly enthusiastic Jewish subjects. The Lord Mayor sent directly to Emperor Alexander II The resolution voted on by the meeting. The result fat what it could be. The document was resented to the Russian ambassador in London, who put it in an envelope and addressed it, without further comment, at the Foreign Office, from where he returned rather pitifully to the first

magistrate of the city, without any sanction was even tempted.

The reasons for the ostracism of which the Israelites are the subject in Russia are more complex. They are more complex than is generally believed: they are religious, economic and political.

The religious question is, if not the most important perhaps, at least the most important-ancient. Already during the reign of Vasili Ivanovich (1505-1533), we see the Jews being harassed as heretics. This is further accentuated under Ivan the Terrible (1533-1584). We also know- lies that the hostile attitude of Catherine II to Their attitude towards them was due to the influence of the Prosecutor-General of the Holy Synod, Fiofan Prokopovich. The extent of religious sentiment, at the time

current, can be judged by the fact that not only the Jews, but the Protestants and the Catholics are viewed with suspicion by a part of the population and certain functionnaires.

It was hardly until under Nicholas I" (1825–1855) that arguments clearly manifest themselves economic measures against the Israelites. The Conservatives fear the presence among the illiterate, ignorant peasants – and whom we hold to keep in ignorance – of a race

But that is not the object we are pursuing—vons here. We would simply like to explain under what traits certain great writers of England have in turn seen, understood, interpreted and describes the physical and moral type of the Jewish and give an accurate idea of the production Jewish literature in the United Kingdom.

Chaucer, in one of the Canterbury Tales, tells us about an Israelite, living in the midst of Christians in a good Asian city, protected by a local lord and who, for the profit From this, he withdrew a huge amount of money from

However, the first a Jewish figure who appears vigorous to us—drawn in detail, among the characteristic images risks created by English fiction, is that of Barabbas in The Jew of Malta (The Rich Jew of Malta). We know the passion, wild energy, out of all proportion with the mediocrity of average humanity, which animates the powerful and fierce genius of the great Shakespeare's predecessor, Christopher Marlowe. This prodigious mind conceived and en—Fanta Faust nearly two centuries before Goethe. Similarly, one can consider the Jew of Malta like the prototype of the Venetian Jew and believe that Barabbas was not useless to Shakespeare when he set about composing his Immortal Shylock.

It is necessary add that Marlowe's drama has a foundation- historical fact. Sultan Suleiman II had a favorite was a Jew named Joseph Nassi. It was not, after all, it must be emphasized, a purely literary feeling, made up of reading common myths and legends that he expressed Marlowe, by giving credence to the most hideous vices, to the most inexplicable crimes, the soul of a Jewish for farmland. The poet had been able to to form a personal and reasoned opinion.

70 JEWISH ENGLAND

We will see, in fact, later in our historical summary, that, despite the edict of expulsion Edward's sion, a fairly considerable number Jewish families had remained in England land, without being disturbed or in the exercise of their worship nor in the exploitation of their industries, at their expense only, when their

chests were largely filled with gold, and
to pour the large portion into the king's hands.

In any case, Marlowe's Jew is

The popularity of Marlowe's drama was
long-lasting and maintained even after
Shakespeare's great successes had trans-
formed the English theatre. Translated into German,

we were still playing *The Jew of Malta*, on the other on the Rhine side, towards the end of the 18th century and, Curiously enough, he excited the spectators to such an extent to the degree that, in order to bring them back to their senses, to a better balanced mental state and the prevent people from rushing out of the theatre the representatives in Germany of the race cursed, they were being spared, immediately after the *Jew of Malta*, the philosophical spectacle Nathan's philosophical, philanthropic, and soothing *The Sage*, where Lessing carved out the type of his Jewish hero on the benevolent and humane patron accredited by the encyclopedists.

Is this the considerable success of Marlowe which prompted Shakespeare to strive as well to flatter public passion by taking a Jewish as the main protagonist of one of his pieces? Are we to believe that apart from all Another consideration was that he was drawn to the interest dramatic double story of money and of love that he knew so wonderfully how to forge and unravel in *The Merchant of Venice*? Portia and Bassanio is borrowed from the Gesta Romanorum and the episode of the pound of flesh to a short story by Giovanni Fiorentino, entitled Tulée II Pecorone. However, it is not without It is worth noting that, as early as 1579, the author of a treatise on abuse (The School of Abuse), Stephen Gosson mentioned a piece of play performed at the "Bull Theatre" and entitled The Jew, where "the es-

was on the agenda and the great Will was confident of interesting his audience by talking to them about it. This is the case if there was plagiarism or copy that the Genie murders those he plunders.

It was assumed that Shakespeare had intended, by drawing Shylock, to give not a counterpart to Marlowe's Barabbas, but of to provide a contrast. We even dared to pretend that all his sympathy was reserved to the Jews and that the stratagem by which Portia brings the final judgment, which was only one forced concession to popular prejudice who certainly would not have suffered that the The moneylender left with clean breeches.

In our opinion, Shylock clearly expresses and simply the living, realistic figure of the Jew, of whom Barabbas is merely the grimacing one and primitive caricature. Barabbas takes in Marlowe's tragedy, the proportions of a wild ogre; Shylock is kept by Shakespeare in normal data and se brings us closer to ordinary humanity. Both However, they are indeed from the same family, and he nothing exists between the two characters of the English theatre, the difference that separates the genius and dramatic character of two essentially impulsive authors.

Shylock, wrote M.A. Mézières, "is a powerful type who represents an entire group of individuals. He has the usual flaws of his race, greed, love of gain obtained by illicit means, the harshness and the brutality of the usurer; but he adds to it a feeling that the Energetic natures experience this alone: it is a deep resentment against Christians who They often humiliated him and he desired revenge. of them... He is indignant at all that his people; he thinks bitterly of antiquity and to the sanctity of the race from which he descended seeing the treatments she is undergoing. He likes to make money; he wouldn't Jewish if he didn't value it; but he loves Even better, to get revenge. The mere sight of a Christian inspires in him an aversion that he does not speak of. He doesn't fake it. Despised and hated, he returns contempt. "For contempt and hatred for hatred."

Is there one of these features, so well detailed, which does not apply to Marlowe's Barabbas? This one, no doubt, also has a haunting fear and the itch of the evil; he rejoices in giving to sacristan-gravedigger on the occasion of the "bell tolling" to ring and graves to dig"; he has the pro-extrahuman portions, – inhuman, the more often, – characters mentioned in

The only difference, then, in summary, is that we can discover between them, – and this The difference is indeed considerable – it is that Shylock is the product of the most intelligent, the largest, the most complicated, the more subtle, more "human" than ever never given the task of studying and painting

II2 JEWISH ENGLAND

Here is the story as we find it summarized-
me in an article signed S. Berger, which appeared
in the magazine Mélusine in March-April 1897:

"William was the son of a farmer from
surroundings of Norwich, the county seat of
Norfolk. Pious and charitable, he was loved by
all. Since the age of eight, he had been
apprenticed to a furrier.
Jews, who had business at his employer's house for

Why do Jews commit crimes?
Rituals? An Israeli historian gives a clear answer.
for the following series of reasons:

- To celebrate Passover: we mix the blood to unleavened bread;

ISRAEL AT JOHN BULL'S 129

- To get rid of their special odor-ciale;
- To make love potions;

- To stop the bleeding at the circumcision of their children;
- To cure secret illnesses;
- For the wedding ceremony between Jews;
- To anoint the rabbi's hands at the mother's blessing in synagogues;
- To facilitate childbirth for women Jewish;
- To make the sacrifices more pleasant to Jehovah;
- To give holy unction to the Jews dying and thus ensure their eternal life;
- To summon demons and force them to answer all questions.

The Hebrew people were therefore not as freed from the superstitions that we have been willing to say. In the lower class one encounters a fanatical and blind credulity which carries certain-enlightened beings destined to become sacrificers of children. The famous Sir Richard Burton, the traveler-English general, wrote a book which, although very independent in his ideas, provides a quantity of evidence of these bloody customs in

Among the countless widespread benefits on the world by the French Revolution, one of the most certainly beneficial, if not the most notable, was a further enrichment of the Jews of England. Quite calmly, without neither leave London nor the area around the Stock Exchange Exchange, without getting passionate about any of the utopias that were then asserting themselves on all sides, these truly circumspect men knew how to be skillful—how to monetize France's misfortunes and convert to pounds sterling perfectly

The real, immortal principles of '89. One could to recognize, on this occasion, one of the procedures from the most lucrative of the Jew: tactic truly spiritual and coldly philosophical phique, which consists of speculating on ideology from the neighbor, to entertain him with appearances, to generously let him have the shade, seizing the prey.

The early 19th century saw the emergence in the Hebrew sky, on the horizon of London, a new constellation that must surpass shattering the Jewish stars previously observed Well before 1808, Nathan Rothschild came to settle in the English capital.

There had been, for a long time, in England, quantity of Jews all in gold: merchants, bankers Quiers, money handlers of all kinds. He there was, in the English West Indies, a number of wealthy and prosperous Jews, escaped pes for most of the Spanish possessions, where persecution was rampant, and who, as founders trading posts that had become powerful had their designated representatives in the metropolis. There there were still, in London, a large number of Jewish people Turkish, Italian, Levantine, who traded with insolent happiness, and displayed each day with more luxurious importance. But

Now, here is the Golden Calf himself.

Nathan was descended from Maier-Anschel Roth-Schild. And Frankfurt, in 1777, had seen him born. At nineteen, he left his father's house, that General Kléber's cannons had just to undermine, and came to Manchester to do his best to traffic in it, like money-lender and pawn-broker, that is to say, financier and pawnbroker. All his fortune was then 1,000 florins.

But, at that time, the fluctuations of Cotton-trade offered attentive people opportunities for fortune that Nathan knew not to neglected, so much so that five years later he had in his pocket 200,000 pounds sterling.

It is with this fortune, already considerable for the time, when Nathan came to London around 1801, and that, driven by love, he married the daughter of Lévi-Barnett-Cohen, a young lady weighing one weight precisely equal: 200,000 pounds sterling. He then established himself at the Stock Exchange, as on the very axle of the wheel of the Fortune.

Some public miseries soon followed to his aid. In 1810, Sir Francis Baring and Abraham Goldsmith having taken on an em-a loan of 14 million pounds sterling for the

Despite the lively verve and biting irony

which are the hallmark of the century, this work is serious, attentive, concerned with conclusions practices. The Prince de Ligne first poses the fundamental idea that we have seen expressed led by Madame de Pompadour, by Voltaire, and since by Lord Stanley, namely that /Israel is a nation: "The Dutch or Portuguese Israelite—"Gais is neither Dutch nor Portuguese; he is not"

"that Jew." It's astonishing that such an apparent truth... annuity needs to be formulated; and yet Very few minds have been able to glimpse it. In general, governments and writers, just like the common people, they do not consent to see in the Jew than a man of another religion, while he is in reality a man of another nation, of a scattered but united nation, and terminantly. This incredible blindness, which puts people at the mercy of an enemy— This, unsuspected, contributed to the power of Israel.

Therefore, considering the Jewish nation, such that it presents itself in Europe in the second mid-18th century, the Prince of Ligne first mentions "some well-educated Jews"
» vés: bankers, merchants, sometimes "barons, almost nobles, established in the capitals" "Christian tales. There are several, including..." "We know the merit and honesty that have "Friends, to whom justice is done for..." "Beautiful acts of humanity."

Then, behind these elite circumcised men, a truly disturbing filth is spreading across Europe. — "Do we want to have their portraits?" "Always sweating from running around the place » public cabarets, to sell there; "almost all of them hunchbacked, with a red beard or

However, the Prince de Ligne did not forget the
the beauty of Jewish women, which he perfected-

"It is, perhaps with a bit more harshness,

Well, all these newspapers advocated

It is easy to make one understand
the role of the Jew in the South African Boom,
organized in 1894 and in the creation of the

war to the death against the Republics.

Let us just remember how the

Long before the crisis, he had made sure, with Eckstein and Barrato, a preponderant interest-derent in the Cape Argus, the evening newspaper of Cape Town, which was then operated by a Company owning at the same time the Johannesburg Star, the Buluwayo Chronicle, the Rhoderian Herald and the African Review. The the most influential newspaper in the colony, the Cape Times, had half of its shares between the hands of Mr. Rutherford Harris, director of the Chartered and associate of Mr. Cecil Rhodes. Queen Alexandra always shared the feelings of his stepmother; but they were the only ones at Court to disdain networking Israelite.

The second class of English Israelites is always, according to the author of Modern Jew, that wealthy, cultured Jews, often not very devout, but fond of the pride of race and marrying only among themselves. These aim to clutter high-level financial situations celebratory, commercial, political, even the fine arts, at least the professions of mar-antique or painting dealers who con- They are due to certain honors. Finally, the fourth class is that of the Alien destitution and miserable emigrants from Slavic nations and Germanic countries and who live in poor neighborhoods looking to happen, to rise above the plebeians and to walk to the conquest of gold by all means more or less scrupulous. They can be found in White-chapel, at Petticoat Lane and Garlston Street in London; they gradually annexed Ham-bury street, Fashion street, Pelham street,

Old Montagu Street and many other streets surrounding neighborhoods.

The alien destitution question has become difficult to solve. The company, well known under the name Jewish Bond of Guardians, found each day its task becomes infinitely more arduous and heavier. Moreover, we had, during the chapters, to make many attempts to the articles that he published in February and March 1900, in La Libre Parole, our distinguished colleague Octave Uzanne under the title: Jewish England. Let us now turn to the number of Jews in the army from the United Kingdom. This number seems to be increasing. grow more every day, especially among the troops of the Metropolis, where there are more more honor to parade than danger of combat. One detail can inform us: the November 26, 1910, being the Jewish festival of Shavuot, the Jews in the English army attended to a service in the Central Synagogue of London, Great Portland Street, numbering of approximately 300 officers and men (according to the Morning Post, which published the account of

this ceremony). There were people of all kinds there. parts of the army, including the Guards, the navy and the (territorial) volunteers. There also had some Jewish-American sailors cains who were in London at that time. All these troops were under the command of letter from D. de Lara Cohen, colonel of the London First Division of Engineering (volunteers). PREFACE TO THE SECOND EDITION

We don't know enough about France that it's in
England and by pious Englishmen that it was created
Freemasonry in 1717; that it is by ver-
English killers that this sect has spread in the
world, particularly in France, under the guise of well-
feance, in reality to serve their interests.

We have managed to mislead public opinion on this point and to
to give this sect absolutely nude origins
geuses.

We do not have the foolish pretension of proving
definitively, in a volume of four hundred
pages, which we did not want to render in any particular aspect
too severe, which would require many volumes
to evade. We also don't have the crazy pre-
attempt to destroy in five minutes the centuries-old work
from a hatefully Anglophile press.

It is worthwhile to examine the "pmg" in

We are quite inclined to see vice under the guise of...

But this English vice, on the contrary, had an aspect
smiling, honest, kind, pleasant, attractive, sym-

These little girls with complexions of lilies and roses, on the skin

of which the slightest speck of dirt would have been noticeable, were very clean. And we know that cleanliness in the needy classes is an indicator of honesty, of activity-speed, is a hope for recovery. They had a enormous gaiety, which is not characteristic of a very dark soul. young men with seraphic eyes, from the Fathers of the Eternal with a respectable demeanor, at the age when little girls attract only distracted attention so far, do not contribute they drank quite a bit into this good-natured gaiety.

But it's horrible, one might think; these children were Martyrs. One must believe that there are graces of lineage. as there are state pardons. Again, they were wildly cheerful, at least those that one saw. They seemed to think that everything was for the better in the most English of worlds. And most English ladies with gold belts seem nowhere to be seen the effects of treatments can be felt in adulthood Childhood. It's the world turned upside down. They seem as healthy, endowed with as good health as their continental colleagues. They also have eyes of a purity and candor that inspire dreams.

After having seen these little girls frolicking and bothering you Their offers, we saw them leaving with men. very seriously, very honorably. It then took a honest aspect. We involuntarily thought of the small-your fresh-complexioned boarders in our convents, to the alert and clever, going for a walk with their grandfather, their uncle, their older brother, and cackling kindly in order to get some sweets or pretty things New Year's gifts. And all of it had class, an enormous amount of race, a refined, aristocratic blood, seductive. Then they would reappear, at the turn from a street, indulging in some provocative childishness to get noticed.

And the fog allowed all of this to be seen through a A fantastic, mysterious, strange veil.

Have we talked enough about English education? It's still
one of those English things that do not withstand scrutiny-
men.

It is surprising, strange, extraordinary, that all
those who have dealt with the English character, have never-
but spoke of that English soul which is absolutely
immutable, at least in part, which cannot be improved
enhanced, nor diminished.

It's quite a job for a continental mother to
to create a soul, and a delicate task: she has to expel
all the bad seeds, to watch for the sprouting of
good, to guide their development, to ensure a
vitality that nothing will be able to stop in the future.
She must spy nightly on the slightest things that
could tarnish this young soul, for the stain would grow
with age and would threaten to invade the entire soul. Everything
This requires careful monitoring.

With the English mother, there is none of that. Such as the
a female dog who gave birth to puppies, who knows that she
would be powerless to make them more loyal and also

less faithful. Like the hen that has just given birth to a brood, knows that its chicks will sing every time that they will have laid an egg; she can do nothing about it. Neither against. Whether he likes it or not, this will be the same.

The English mother cannot make her son any more or less false, hypocritical, irreligious, and morally bankrupt, There's absolutely nothing she can do about it. Good purebred hunting dog. This is the fundamental characteristic of the English soul, the the animal side over which the will has no hold.

A continental mother, on the contrary, will monitor the the seeds of these defects, will eliminate them or, on the contrary, the will develop, depending on whether she is honest or dishonest. She will have a hold on her child's soul, that she will knead like soft wax.

Do the English have a religious sense?

We find it very difficult to admit. We must not I can't believe they're going to all these extrareligious associations, simply for the pleasure of to be mocked by the mainlanders. They do not fear—Nothing is more effective than mockery.

We could cite an English lady belonging to the cream of the English aristocracy which has three religions: she is Anglican when she is in England; Presbyterian, when she goes to Scotland; and Catholic, or so close to becoming so that one can consider it as such, when she comes to France. It's absolute—It's ludicrous; and it's the negation of all religious meaning. What we have just said about this noble lady, This could be repeated about any Englishman.

It's a kind of compensation that nature has given them. Granted. They take on the airs of Seraphim, of Fathers. They are eternal, they look very respectable, that's a fact. Indeed. And their vanity is satisfied.

The humblest English clog maker who comes to the continent immediately calls himself a baronet; he is at least a relative of Gladstone, unless it was Lord Salisbury: her sister has just joined as a lady-in-waiting to the Court. It is considered very bad form to ask an English tourist, what is his profession? Don't look like at least imagine that he is a merchant. You risk being swallowed whole. The least he can do. To be, is to be a gentleman farmer or in other words, a landowner to live nobly on one's land. That is the rest-visibility while traveling, obtained through the adaptation of father-land. It is one of their main concerns in a journey to play the gentleman of high society.

But, at home, where everyone knows they are from simple clog makers, where they do not have the resources to pass themselves off as what they are not, they have the respectability through religion. And then they leave the temple, or at least they were going home, looking dejected (It's in the laws of respectability, however bizarre) than the laws of chivalry of Don Quixote), without to utter a word. This is the origin of this Sunday morning air of sorrow.

We know that the English have a strange kind of drunkenness, particular. THE ENGLISH IS A FELINE

The Englishman is positively like a cat.
| I

Let's look at his language first.

The English language is the French language put into
music, in a music that one hears in the tastes-
thirds by the beautiful moonlight.

First, there are the intonations: the "ow" intonations,
as in sorrow, morrow, which are reminiscent of meows; -
The intonations in 2ng, as in morning, evening,

phrases spoken in low registers, which one-
It often happens in the street, when you mingle with crowds,
such as: "get up away with you" which, articulated rapidly-
demented, they are virtually indistinguishable from an oath
from cat, to "fuck, fuck."

Apart from these intonations, there are different registers very, as organists say: we speak with low, mid-range, or high and singing notes.

ENGLAND AND FREEMASONRY 193

Furthermore, there is a kind of measure that is out of step with the times, formed of harsh monosyllables that accentuate this measure: up, down, and, it, out, get, bach... etc.

There are also words and sets of words which result in feline leaps.

The French language, on the contrary, flows like a stream, each syllable having the same value, the tonality being always the same.

IT

The music is also quite curious, not for a Conservatory student, but for someone who wants to study the English character.

We have before us an idyllic piece of piano which was very successful a few years ago-born, titled: Fairy Voices.

The fairies arrive stealthily, singing, on a pianissimo, in the middle of a clearing, on a beautiful Moonlight. Owls are in the trees, animals Mysterious ailments; bats are flying. In the In the nearby marsh, toads are croaking. That's what represents the cover of this piece.

Then, in the opposite direction, the sweet "Fairies" return.

the epileptic chant "We are Fairies", and then the final which contains a page, pianissimo, with an accompaniment of a sylph, of an undine, fading away, dying little by little, disappearing.

One involuntarily thinks of cats that go outside silently at night from a gutter, a basement window, by in the moonlight, they meet, uttering epileptic cries ticks have undulating movements on the top of the roofs, then they sing softly, stop to jitter, with hoarse, guttural cries, sing again a gentle pattern, throw out a few epileptic cries, renthirty silently in their basement window.

It's a piece written instinctively. There's no feeling—There is no liar, nor intellect in this 13-page piece. There is none. There's nothing but movement, cat movements. cats, the mind refers to fairies and from fairies to Anclays; he often leaps over the step.

We recommend this well-known piece as a bizarre and very typical production, interesting for those who want to study the English soul. We We could cite many other popular waltzes, produced in recent years, to the movements slow, gentle, without jolts, without movement sionné. We could, however, cite many others very popular pieces, with movements jerky, hoarse, bizarre.

First, we hear the ca-studded on Juliette's body, touching the ground with a a dull thud, though quite considerable. Then i'nmé-directly after the more bony shoulders with a noise more violent, and finally the skull with a huge bang. We look. We see Juliette lying in one of those immense English smocks, made of fine silk, colored in Soft shades, body-hugging, although very wide, resembling a simple pink shirt, placed directly-lies on the skin: we look at her delicate face shades of pink and lily, her fine, blond hair. Did the skull open? A continental woman would certainly have found herself in trouble from this fall. The English women must have some compensations in life. They are ripe for the maternity; but very few of them reach the maturity of the senses.

DRUNKENNESS

If "all French women are courtesans," which does not seem to us close to being demonstrated, we can say that "all Englishwomen are drunkards." We believe there are no exceptions to this rule.

We would certainly surprise a certain friend at whose house we spent a few days recently, in the company of a young lady, telling her that this young lady-saddle had made sacrifices to Bacchus in the day-born. She wouldn't believe it.

A Frenchman goes to a café and, to set the tone, While talking, often without realizing it, he gets excited. drinks more than he should and gets drunk.

An Englishwoman does this methodically. She calculates she has two hours to spend in solitude; She swallows in one gulp whatever is meant to keep her under its spell. Meanwhile. If after these two hours, she is Forced to go to the office, the drunkenness has more or less passed, and with its racial impassivity, the English custom of not to engage in expansive movements the dress, it goes unnoticed. If she has nothing better

194 ENGLAND

If she does this, she takes a second dose two hours later. She's at a friend's house, she has her bottle of gin in her trunk; she takes things from it in the evening before going to bed, or During the day, she feels the need to go and say his hours in his room, in silence and so: a state that suits a meditative and easy-hearted soul ecstatic.

What is characteristic of it is that this ivory-gnery is widespread in all classes. It makes probably more devastation in the lower classes, the drinks being more adulterated.

We understand that a poor working woman, a poor sailor's wife, who cannot procure others enjoyments, giving in to this dubious pleasure. But What seems strange is that rich people, having Having tasted the cup of all pleasures, they cannot manage to to extract from these pleasures the joys that one would find there continental and resort to drunkenness. The soul and Clay cannot experience higher pleasures. "To be or not to be," said Shakespeare; "life is worth—" Is it worth living? This race would inspire a Great pity, if she deserved it.

of that other fatal instinct which compels all representatives so many of this so-called free race, to celebrate Bacchus.

Intoxication in other races is merely a bad habit. Among the English, it seems a necessity real. It is no longer just an artificial need, a second nature, like habit.

We spent too much time in England to believing in teatottlers, etc., drinkers of waters of all kinds piece. We do not admit that one can be An-Glad without being drunk. But everyone knows how to play their part. Surprisingly, they played roles of sober men. Eh Well! There's no denying it, their old people sometimes appear more vigorous than ours. Elderly people look well, have a remarkable complexion It's so fresh. It's absolutely incredible!

Asylums are certainly overflowing with alcoholics. It's certain that there's some waste. But consider the mass of the population; it has good health. What would happen? On the contrary, what if we deprived these people of alcohol? Wouldn't there be... Wouldn't it do even more harm? Alcohol is pretty much indispensable to the economy of ordinary races. But For the English breed, it is a vital necessity.

We are far from advocating drunkenness. We believe that French people who would like to give up Their health would quickly improve under this hygienic regimen. irremediably compromised, and our self-esteem national does not suffer in the slightest from admitting This inferiority; far from it.

people or that they at least have state pardons for the supporter.

In France, a drunkard usually has a red nose and almost always with cloudy eyes, sometimes bloodshot-slow. You see, on the contrary, an old Englishman, who started cultivating the bottle from his prime youth, who got drunk at least every Sunday, who drank enough by himself to make the noses of an entire common. The lines of the nose are not pasty, but On the contrary, they stand out very finely, very firmly; the eyes have this admirable clarity, this transparency a quality that even the finest precious stones lack, that one only sees in the opalescent waves of torrents of Our mountains. They are not troubled. A painter who would like to find a model for a follower of Bacchus, would not find it in England. These people have at the contrary all the signs of sober people, almost ascetics but of cheerful ascetics, unsaddened by privations, to the virtue costs nothing.

And yet all these people drink: how? when?

There's nothing as fun as supporting something paradox in front of some Japanese women. They have horror. They are the source of error in themselves and in others. They are very. They then whine with impatience, they are unhappy, their figure contracts, and they cling with all their forces to remove this error from your mind. It seems-would say that they are facing a reckless person who, unconsciously Cimentement, will throw itself into the river. The smallest grain of millet, or rather the smallest man of action, which would preach as little as possible, but would act, would bring people together, would do our af-TO DO.

This is the role Casimir Périer could have played. 11 was perhaps qualified to play this role. The virus masonic, which was probably transmitted to him by heredité, produced on him the effect of poorly treated syphilis on a healthy body.

And this man leaves two French officers in a German prison, when he could have it picked up a hundred German spies so easily and exchange them! He shouldn't say he can't. And above all, he spare us his pompous and stupid reasons which these gentlemen from the Quai readily heap upon us d'Orsay, these responses from sycophantic lackeys who want-slow to impress the bourgeois.

This is not a mistake once it has been made, irremediable, something that cannot be reversed. It is of a mistake that is committed, that is repeated every day. Every morning, Périer can tell himself: "There's always time to act," and he thought to himself, "That would be diplomacy, not..." "Masonry!!!"

Casimir is the epitome of the parliamentary bat. "Mice, see my fur; birds, see my feathers; F.. look at my rag; conservatives, look at my "Stripper." It's very nice to hear Baron sing:

About this book

This is a digital copy of a work that has been preserved for generations on library shelves with the utmost precaution by Google as part of a project aimed at allowing internet users to discover the world's hidden treasure.

This book being relatively old, it is no longer protected by copyright law and now belongs to the public domain. "Belonging to the public domain" means that the book in question has never been subject to copyright. Expiration. The conditions required for a book to enter the public domain can vary from country to country. These are all links to the past. They bear witness to the richness of our history, our culture, and our knowledge, too often difficult for the public to access.

The footnotes and other marginal annotations present in the original volume are reproduced in this digital edition. The long journey the book has taken from the publishing house through the library to the internet is a testament to the power of the written word.

Instructions for use

Google is proud to partner with libraries to digitize works in the public domain and make them thus accessible to all. These books are indeed the property of everyone and we are simply making them available. However, this is a costly project. Therefore, and in order to continue disseminating these works, Google has taken necessary measures to prevent potential abuses by third-party merchant sites, in particular by implementing technical constraints related to automated queries.

2 THE JEWISH QUESTION.

Drumont speaks in the name of his faith, in the name
of his religious beliefs, in the name of
Christ, at the same time as in the name of the pa-
French sorting.

I answer him in the name of the French homeland-
çaise, in the name of republican France.

He shouted: "France is in danger! We

But Drumont's France is not alone-
Aryan France, the France of the fa-
a thousand Christians, she is also the France of
the Catholic family.

It's good that you said that, it's heroic.
for having said it first. But it's not
still enough so as not to leave in the in-
certainty the large fraction of the country which con-
establishes republican France.

Yes, I am entirely with my colleague.

8: THE JEWISH QUESTION.

Let us now strive not to dis-

turning against us, by seconding too well
the efforts and interests of our enemies.

The Jew, whether he consents or not, is a
enemy.

I am writing this brochure to express everything
my thoughts, and to present all my reasons
on the nature of this exceptional enemy.

Let us consider it as such, in the De and in
the future.

And that the French, the Republicans,
ask me this question:

Whose benefit was the Revolution made?
French?

I am convinced, for my part, that before
think about making room in new ideas

our French race, we have allowed too many inter-
stices where the interstitial species of the Jew has fau-

For France, you did it for the Jew.

Everything in the past, in the pre-

Let's retrace our steps.

There was a misunderstanding.

The game has to start again.

I have every right to speak like this:

I belong to old France by the
blood in my veins, to the news by my
education, and, what's more, through sacrifices
from those who raised me.

My ties with the new France are...
deep bonds of love for my country and of

and the Christian states." The other is called: Baron Jehovah (1). He is from Mr. Sydney Vigneaux. Baron Jehovah is a book of a Intensity of thought and criticism, rare. It is the safe and scholarly dismantling of psychology of the Jew. I will come back to this later, when I have to talk about the Jewish financial system, this system of which Montesquieu would have said, that it is he especially those who support states like the rope supports the hanged man. Em:

Abbé Léman's book is quite different. Authorizing itself by the edict of Louis XVI, this book calls the Jews to Catholicism. "They have a "Divine right," said Father Léman. We don't have any of that. We have more. According to Mr. Léman, there would be perhaps a way to reconcile everything on this terrain. For "it is with the King at its head that the France will be able to resolve appropriately—ment and to bring this undertaking to a successful conclusion such a delicate and complex grasp of emancipation _tion of the Jews". " 0.

THE SONG OF DEEDS. 21

Designed in this way, Mr. Léman's book, despite the good intentions that inspire him, is a A barren book. It's a Jewish book. Barren, because that by transforming France into a way of the Promised Land, it relies a priori on the conclusions of a theorem whose premises are perhaps contradictory and do not establish in no way the possibility of such a de—

freedom, which becomes harmful and unbearable to France. We'll talk about it again.

The only merit of Father Léman's book is to give us a fairly complete picture preventive measures of old France against the Jews. For old France was never did anything but defend themselves against these invaders mysterious heavers, And when Saint Louis, for example, took strict measures against Israel, it was only when he was there forced by the need to save his subjects.

Incidentally, it is not without its advantages that to recall that the existence of the book by the abbot Lake Geneva was revealed to us by an article in the Figaro. It must be said, but the traditional-tions of widespread skepticism bequeathed by Ville-Messing to his successors have good and bad cheerfulness too. Le Figaro, which launched the book of Drumont has ways that are personal to him-new ways of receiving communion at all the altars where Appeal and curiosity should attract world. It is the quintessential diverse newspaper,

He was the one who marked Israel with the sign of the cross which we recognize. It is he who has dictated to the old French society the measures precautionary measures that she had posted against the Jew at the city gates. It was he who, in showing us in Jehovah the Jewish deity, that is to say, what is most characteristic in the spirit of this people, allows us to think that after all this, Jehovah is the worst. The Jews are, in short, nothing more than a Jewish.

Humiliating the Jew was therefore not part of an idea of old France called into question. The Jew asserted it to give himself the right Taking revenge is another matter; 'Lies have never blackened the lips of a Jewish, especially when this lie is directed
